Hood Colours available - White, Black, Primrose, Stoney Beige, Federation Green, Mist Green and Heritage Red

Handy Hints

- You will need a good Tape Measure (metal ones are the best) all measurements are in mm (1800mm width).
- When measuring, always look out for things like down pipes, windows that open outwards or if the awning (with arms) will be in the way of a walk way (Auto Lock Arm & Cord & Reel Awnings)
- All our awnings & blinds can be fitted face fix or recess fit. This gives you complete control over the positioning of your awning and blind.

Face Fixing Blinds and Awnings

This is more desirable as positive cover is given on sides of window to be covered.

Simple steps to FACE FIT (Outside Mount)

Follow these instructions if you want the awning or blind to hang outside the window recess:

WIDTH: Measure reveal width and add a minimum of 150mm to each side where possible or half post width if blinds are side by side (second blind at later date) or full width of post if only one blind required. Note the measurement.

DROP : Take a point 150mm above window or top of beam on patio, measure from the point to required drop.

Recess Fixing Blinds and Awnings

If sufficient timber is available for fixing.

Simple steps to RECESS (Inside Mount).

Follow these instructions if you want the awning or blind to hang inside the window recess:

WIDTH: Measure reveal between bricks. State opening size.

DROP : Measure lintel to sill.
