Shadecloth Blinds

Clear blinds outside and inside view

sloping head

The Veranda Drop Blind are great for the veranda, patio, pergola or any outside entertainment area. The blind is made with a 19 x 19 mm square aluminium tube at the top pocket which makes it so versatile for fitting eg face fit, recess fit and sloping head. The cord will support the blinds but if very windy there is no way of anchoring them at half way. Blinds are either all way down or all the way up. Available in Mesh, Clear or Tint PVC, Acrylic, Canvas and Shadecloth. The mesh and 1mm Easlislip Clear PVC is high frequency welded on the sides whereas the shadecloth, acrylic and canvas fabric is hemmed/stitched. Please note: PVC material may shrink in size by up to 3%

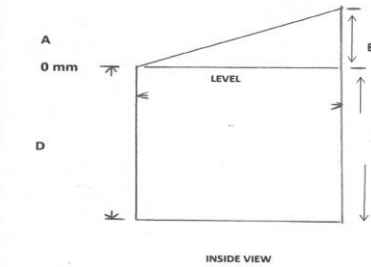

blinds are able to be zipped together great for covering large areas. Zips only available for Clear PVC and Mesh.

outside and inside view

Measuring for a sloping head

for sloping head take a level to make sure ground is level measure drop both sides looking from the inside

Measure from inside as per diagram

Mesh Blinds

Clear PVC and Acrylic together
